* *Imaginary.*

Such is the relative table of the Bombay current and imaginary coins; while in accounts they are confined to the following reckoning 100 Reas make 1 Quarter.—4 Quarters 1 Rupee.

As to the intrinsic value of their Coins, we find from STEVENS'S GUIDE that the Board of Government in December, 1738, fixed the standard weight of the Rupee at 178-314 Grains: and in 1774 that the Gold Mohur was directed to be coined of the same weight, and to pass for 15 of the Silver Rupees; while in fineness it should be equal to the Venetian, thereby preserving about the same ratio at which the precious metals pass in the market.

The following table of some Assays made at Bombay, by shewing the centesimal parts of alloy which they contain, will display the specific value of a variety of Coins that occasionally pass with them as the medium of commercial exchange. It is also worthy of remark that few or none of their own Rupees exist in circulation; from a privilege granted to the Nabob of Surat, whose silver coinage was permitted to circulate indiscriminately with that of the Bombay Mint, and being by the abuse of this privilege so much inferior in value, has usurped the sole currency of the place.

Although the foregoing Tables represent the commonly received standard of the Gross Weights at Bombay and Surat, it is not only impossible to lay down a rule whereby to judge what commodities in the Market are separately governed by them; but there is a great variety of articles, too numerous to distinguish here, in the sale of which the foregoing relations do not obtain, particularly with respect to the *Surat Maund*, which, notwithstanding it is said to contain only 40 Seers, or 37 Pounds, 7 Ounces, and 6 Drams, is sometimes 41, 2, 3, through all the intermediate gradations up to 46 Seers: nor is the Candy uniformly confined to 20 Maunds: for example, Pepper and Sandalwood are sold by the *Bombay Candy* of 21 Maunds, and Cotton, the great Staple commodity of their Market, by the *Surat Candy* of 21 Maunds.

The finest Gold among them is 100 touch, called Sycee, i. e. pure Gold without alloy : so that if a Shoe of Gold touch 93, then it hath 93 parts of fine Gold and 7 parts alloy.

Gold is bought by 10 tale weight, for upon that quantity they make their price in Silver.

When Gold is sold above or under touch, you must add to, or subtract from the touch. As if it touch 96, and is to be sold at 4, under touch, then from 96 take 4 the remainder is 92 ; then is 9, two tenths of Silver to be paid for one of that Gold. If Gold is at 96 touch, and to be sold at 8 above touch, then add 8 to 96, the sum is 104 ; then are 10, four tenths of Silver to be paid for one of Gold.

In China all sorts of Provisions, as Milk, Fowls, Hogs, Greens, &c. are sold by the Catty.
